Accomplished Client Systems Engineer with 14 years' experience providing outstanding customer service to a variety of external and internal customers including Software Development using Filemaker and System Center Service Manager. Looking to focus more on working with Customers on the Development side.

Professional Experience

IT Client Systems Engineer – FTE / Sound Transit / Seattle, WA

May 2017 – Present

- Provide support and serve as a point of escalation for Macs, PC's, iOS and Android Tablets agency wide.
- Office 365 Administration and Troubleshooting including usage of PowerShell commands to access advanced administration features.
- Created and Documented PowerShell scripts for my team to automate the creation of Resource Rooms and Shared Calendars with default settings not available in the Admin Center GUI.
- Created Documentation on necessary day to day Office 365 Exchange PowerShell Scripts for my team.
- Created a PowerShell Script to run through Active Directory OU's and perform a cleanup on Telephone and IP Phone fields for the Jabber rollout.
- Currently configuring and deploying JAMF to agency Macs in order to support the environment more efficiently.
- Point of contact for any new requests or changes in System Center Service Manager.
- Provide all Tiers of support for System Center Service Manager.
- Worked with our Change Owner to modify our current Change Request templates as needed to follow new ITIL processes.
- Worked with both internal IT and external teams to gather requirements and build new workflows that will improve the efficiency of their requests.
- Configuring new Email notifications within Service Manager that require knowledge of HTML.
- Documented all System Center Service Manager procedures on creating new workflows, troubleshooting, server upgrades, and configuring settings.
- Documented all newly created Workflows as a record of changes in Service Manager.

Client Systems Administrator – Contract / Sound Transit / Seattle, WA

March 2016 – May 2017

- Provide support and maintenance of Macs, iOS Devices and Android Tablets as a primary point of contact for the Creative Services and IT Development department.
- Advise and manage software and hardware updates for Macs including tracking AppleCare Warranty.
- Utilize Airwatch MDM to manage and deploy mobile devices throughout Agency.
- Provide a point of escalation for Service Desk for Active Directory, Office 365, general troubleshooting.
- Develop Knowledge Base articles related to Mac, iOS and Android support for Analysts and End Users.
- Provided basic support for System Center Service Manager with self-education and research.
- Provide outstanding customer support to end users and coworkers providing accurate feedback on technical problems and coordination communications between client and information technology staff.

IT Consultant / Machattan Inc / New York, NY

2008 – 2016

- Managed all desktop and server support, wireless and wired networks, printing, audio/visual, inventory, security, digital asset management, On-site and Off-site backups, and yearly project deployments.
- Provided insightful and friendly support to multiple clients, taking absolute responsibility as the point of contact for each, while earning clients trust due to my patience and empathy.

- Provided onsite, face-to-face expertise and training to Users, Partners and CEOs.
- Continued my Filemaker Developer role to work with various clients with the creation of new and troubleshooting of existing Filemaker Databases. Took ownership of each project as the sole Filemaker Developer in my company. Gathered requirements from different departments at each client to continue to revamp their databases.
- Advised, supported and managed all client/server projects including Software/Hardware rollouts and upgrades.
- Performed email migrations from Gmail to Hosted Exchange and vice versa.
- Collaborated with multiple vendors for all equipment and services including printers, telephones, ISP, email.
- Provided On-site Apple Certified Hardware Repairs as an Apple Certified Mac Technician.

Client Systems Administrator / Hirschhorn & Young Graphics / New York, NY

2003 – 2008

- Provided support of all levels for all users and equipment including Servers, Networking and Backups.
- Took self-initiative to learn and become the in-house Filemaker Developer along with my other duties. Managed existing databases and developed all new projects using Filemaker Pro by gathering requirements from various teams. The Filemaker Database was crucial for the day-to-day ticketing, asset inventory and timesheet system of the company.
- Maintained all aspects of technology including printing, software deployment, telecommunications, audio/visual, inventory, digital asset management, font licensing, backups and servers.
